

MITGI
MIDWEST INDUSTRIAL TOOL GRINDING, INC.

Custom *tooling*

CUSTOM TOOLING FOR MEDICAL, COMPUTER, AEROSPACE, AND OTHER INDUSTRIES

At MITGI, we believe with unwavering conviction in the quality of our products and we stand behind our tools 100%. And the second you begin using our tools, we know that you will feel the same way.

More Equipment, Higher Capacity

Last fall when we moved into our new facility and settled in with our existing equipment, we found that we had room to spare. Since we transitioned from a 2,000 sq.ft. building to the new 20,000 sq.ft. location, we weren't surprised. More room in our new facility meant that we had the space for additional production equipment.

We've been busy putting the expanded production area to good use manufacturing some of our most widely used tools. Like the custom tools we've made for years, these standard tools are the same high quality, tight tolerance tools you've come to expect from MITGI. Standard tools are stored on-site and are

ready for same day shipping service. Threadmill production has increased, both for our standard product line and those that are customer specific. With the addition of new equipment, we've also been able to provide quick turnaround on larger orders of end mills.

Custom work? Standard tools? Short timeline? We're ready.

Come for a Tour, Stay for Lunch

We're so proud of our new facility, we'd love to show you around. Contact Jeff to make arrangements for your personal tour. While you're here, we'll treat you to lunch!

THE FUNNY BITS

Summer was over and the teacher was asking the class about their vacation. She turned to little Johnny and asked what he did over the Summer. "We visited my grandmother in Hutchinson, Minnesota," he said.

"That sounds like an excellent vocabulary word," the teacher said, "Can you tell the class how you spell that?"

Little Johnny thought about it and said, "Come to think of it, she lives in Ohio."
