Volume 1, Issue 6, April 2010

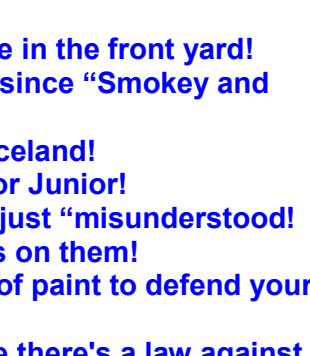

We have received our Rollomatic Nano 6 and have it in production. We are very excited about this and look forward to doing some quicker turn-around work. This machine will primarily focus on 1/8" shank material doing a variety of sizes of End Mills, Drills, and De-burring Knives. The addition of the Nano 6 will help free up some time on our other machines and allow us to meet production deadlines much easier in the shop. We hope to be able to turn some larger size tooling out quicker as a result of the new machine being added. We continue to look for a larger facility. With the addition of the new machine and 2 people we have added to the staff, we are running out of room. We do plan to stay in the same area and have a few options we are contemplating. We are also planning on additions of other equipment through quarter 3 and 4 of this year. Thank you to all of our customers for the increases in business!
